

<p>Step 1</p>		<p>Start with the two bath towels. If you are going to do a monogram for a wedding Cake the monogram will need to go on the towels first.</p> <p>Lay out one towel lengthwise, and fold the towel into thirds. Make sure the folds are even throughout the length of the towel. Make sure the ends are even as well.</p>
<p>Step 2</p>		<p>Fold the towel that is now in thirds in half, over the previous folds. Make sure that the ends are even throughout the length of the towel; the neater the folds, the better your wedding cake will look.</p>
<p>Step 3</p>		<p>Repeat the same folds with the second bath towel. If you have folded carefully, the ends should be the same. Pin one end of each of the folded bath towels together with two safety pins.</p> <p>Your two towels should now be end to end.</p>
<p>Step 4</p>	 <p>Joining edges of the bath towels</p>	<p>Starting at one end, carefully roll the towels in one long roll as shown on the left. Try to roll as tightly as possible.</p>

<p>Step 5</p>	 <p>Top of the rolled bath towel</p>	<p>Notice that the top of your finished roll has a right and a wrong side. The edges of the towel show on the wrong side; the edges don't show on the right side. Place the finished roll so that the right side is up as shown in the left picture. Make sure that the top of the roll is relatively flat. If it is not flat, the next layer won't lay nicely on the top, and you have not taken enough care in folding and rolling your towel.</p>
<p>Step 6</p>	 <p>Rolled bath towel</p>	<p>To fasten, either tie a satin or organza ribbon closely around the roll, or use regular or decorative straight pins to fasten the ends. If you are using straight pins, make sure to use at least three long pins, and put them firmly in place.</p>
<p>Step 7</p>	 <p>Unrolled hand towel-- fold differently than bath towel</p>	<p>Repeat with the hand towels and the washcloths, except use three hand towels, and only fold to between 1/2 way and 3/4 to the opposite edge as shown. Place the roll of hand towels on top of the roll with the bath towels, again remembering that there is a right side and a wrong side, and place the roll with the washcloths at the very top. You're almost done!</p>
<p>Step 8</p>	 <p>Finished towel wedding cake!</p>	<p>Here comes the fun part! Take your ribbon and wrap all three layers to keep them together. Tie a decorative bow at the top. You can also use straight pins to fasten appliques, other bows, and even "tuck" things in the top and sides of your "cake." Kitchen utensils and small baby items for baby showers fit beautifully!</p>

For a monogrammed towel wedding Cake create on your top layer a monogram in the center of your wash cloths before rolling. You can do this for all three layers, Note the towels will be in sets of two the one inside the cake and the one that is visible outside Monogram both so the bride and groom can actually take the cake apart and have monogrammed Towels.
